LE CLOSE PROTECTION OPERATIONS I

This thirty hour course is intended to expose law enforcement professionals to the complex yet rewarding realm of close protection. Training time will be maximized with little downtime between evolutions. Attendees will be challenged academically and in practical applications.

Topics of instruction will include low profile, high profile and high threat protection postures. As well as, the necessary law enforcement and intelligence roles that support a planned protection task. Course participants will learn by doing. Upon completion of the comprehensive course, participants can expect to exit this training with the ability to staff and manage a fully functioning protection team - or to supplement an existing team during a VIP visit.
